Please find below and/or attached an Office communication concerning this application or proceeding.

# Office Action Summary

Application No.

09/775,738

Applicant(s)

SUZUKI

Examiner

Joy K Contee

Art Unit

2686

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 22 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-14 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-14 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_
- ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made

2. Claims 1, 3-7 and 13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alperovich, U.S. Patent No. 6,175,741, in view of Klausner et al. (Klausner), U.S. Patent No. 5,572,576.

Regarding claim 1, Alperovich discloses an information processing system comprising:

a digital cellular telephone set (i.e., mobile station (MS) 20) which transmits via a wireless communication link a caller number specific to a caller (i.e., reads on calling party ID and/or calling party number) which is added to an incoming signal (i.e., reads on incoming call) arriving at itself (i.e., reads on MS 20) (col. 4, lines 17-27 and col. 5, line 57 to col. 6, line 6); and

an information processing apparatus (i.e., reads on caller ID interface 276 within the supplementary service application 270) which receives said caller number transmitted by said telephone set, reads personal information on said caller associated with said caller number from a storage means (i.e., reads on business card file), and displays the information; whereby said personal information includes information other than the name and address of said caller associated with said caller number (i.e., reads

Art Unit: 2686

on business card information, e.g., company name, title, fax number and email address) (col. 5, line 64 to col. 6, line 6).

Alperovich fails to explicitly disclose whereby a summary of said personal information is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.

In a similar field of endeavor, Klausner provides evidence whereby a summary of said personal information is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items (e.g., fax number or other relevant associated information) in said summary is selected (col. 3, lines 1-5 and lines 8-13).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Alperovich to include additional information regarding calling party for display for the purpose providing the subscriber with convenient information.

Regarding claims 3, 4 and 5, Alperovich discloses an information processing apparatus and program storage medium (and method of steps) comprising:

receiving means for receiving via a wireless communication link a caller number specific to a caller which is added to an incoming signal arriving at a digital cellular telephone set from the cellular telephone set (col. 5, lines 57-64);

storage means (i.e., reads on business card file) for storing personal information on said caller associated with said caller number (col. 5, line 40-56); and

read and display means for reading said personal information associated with said caller number from said storage means and displaying the personal information;

Art Unit: 2686

whereby said personal information includes information other than the name and address of said caller associated with said caller number (i.e., reads on business card information, e.g., company name, title, fax number and email address) (col. 5, line 64 to col. 6, line 6).

Alperovich fails to explicitly disclose whereby a summary of said personal information is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.

In a similar field of endeavor, Klausner provides evidence whereby a summary of said personal information is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items (e.g., fax number or other relevant associated information) in said summary is selected (col. 3, lines 1-5 and lines 8-13).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Alperovich to include additional information regarding calling party for display for the purpose providing the subscriber with convenient information.

Regarding claims 6, 13 and 14, Alperovich discloses a telephone set and program storage medium (and method of steps) comprising:

detecting means (i.e., reads on caller ID service) detecting a caller number which is added to a transmitted incoming signal (col. 5, lines 57-64); and

transmitting means for transmitting said caller number to an information processing apparatus which reads from a storage means and displays personal information on a caller associated with said caller number (col. 4, lines 17-27); whereby

Art Unit: 2686

said personal information includes information other than the name and address of said caller associated with said caller number (i.e., reads on business card information, e.g., company name, title, fax number and email address) (col. 5, lines 64 to col. 6, line 6).

Alperovich fails to explicitly disclose whereby a summary of said personal information is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items in said summary is selected.

In a similar field of endeavor, Klausner provides evidence whereby a summary of said personal information is displayed, and detailed information associated with one or more items in said summary is displayed when said one or more items (e.g., fax number or other relevant associated information) in said summary is selected (col. 3, lines 1-5 and lines 8-13).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Alperovich to include additional information regarding calling party for display for the purpose providing the subscriber with convenient information.

Regarding claim 7, Alperovich discloses the telephone set according to claim 6 further comprising: wireless telephone communication means for receiving an incoming signal transmitted from a wireless telephone network (col. 5, lines 57-64).

Regarding claim 12, Alperovich discloses the telephone set according to claim 6 wherein a conversation with a caller is made possible after said transmitting means has transmitted said caller number (col. 8, line 32-38).

Art Unit: 2686

3. Claims 2 and 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alperovich and Klausner, in further view of Peacock et al. ("Peacock"), U.S. Patent No. 6,601,111.

Regarding claims 2,8 and 9, Alperovich as modified by Klausner discloses the information processing system according to claims 1 and 6, respectively but fails to explicitly disclose wherein said telephone set transmits said caller number via a first short-range wireless communication means and wherein said information processing apparatus receives said caller number via a second short-range wireless communication means.

In a similar field of endeavor, Peacock discloses two mobile computing devices, each mobile computing device has a corresponding infrared transceiver that can transmit and receive infrared data signals (i.e., reads on short-range wireless and predetermined short-range wireless), to share personal information from electronic business cards (col. 7, lines 15-27).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modified Alperovich to include short-range wireless link capability for the purpose of providing immediate transfer of business card information as taught in Peacock.

Regarding claim 10, Alperovich and Klausner as modified by Peacock discloses the telephone set according to claim 8 wherein said transmitting means transmits said caller number when communication is available (i.e., reads on incoming call in

Art Unit: 2686

conjunction with Caller ID) in said information processing apparatus (see Alperovich, col. 5, line 40 to col. 6, line 6).

Regarding claim 11, Alperovich and Klausner as modified by Peacock discloses the telephone set according to claim 9 wherein said transmitting means transmits said caller number when communication is available .e., reads on incoming call in conjunction with Caller ID) in said information processing apparatus (see Alperovich, col. 5, line 40 to col. 6, line 6).

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joy K Contee whose telephone number is 703-308-0149. The examiner can normally be reached on 5:30 a.m. to 2:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on 703-305-4379. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-306-0377.

  
Joy Contee
